

# TI DSP Development Environment - Software & Tool

TI and 3rd party design-house offer customization services for these reference designs, including design modification, BOM optimization, custom firmware and algorithms, to help product developers take their designs-to-market faster. EVM users can get access to source files like Gerber, schematics, to be able to make necessary modifications to the PCB design to suit product development.

Ordering Number :

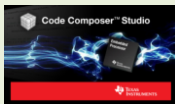

TMDSCCS-ALLN01  
TMDSCCS-ALLF01  
TMDSCCS-ALLF03  
TMDSCCS-ALLF05

**Integrated development environment for TI embedded processors**

Includes debugger, compiler, editor, operating system...

The IDE is built on the Eclipse open source software framework

## Debug System (PC)

### Code Composer Studio™ IDE

## JTAG Emulator

## EMU

Ordering Number : XDS510USB-Plus

Spectrum Digital  
no power supply  
+1.8V to +5V  
Adaptive clocking support  
14 pin/compact 20 pin/20-pin ARM/60-pin  
CCSv3.x and later

## EMU

Ordering Number : XDS560V2STM

Spectrum Digital  
MIPI System Trace capability, 128 Mbyte trace buffer, up to 100 MHz export clock  
need power supply  
+1.2V to +4.1V  
14 pin/compact 20 pin/20-pin ARM/60-pin  
CCSv4.2 and later

no power supply required

Ordering Number : XDS560V2STM-Traveler

## IPNCs

Ordering Number :  
TMD5IPCAM8127J3  
DM385IPNC-AR0331  
DM385IPNC-MN34041

DM368IPNC-MT5  
DM368IPNC-IMX036  
DM368IPNC-IMX136  
DM368IPNC-OV2715

## Target EVM Board

## Netra

Ordering Number :

TMDSEVM8168  
1.2G Cortex-A8  
1G C674x  
600M 3 HDVICP

## TMDSEVM8148

1G Cortex-A8  
750M C674x  
450M 1 HDVICP

## Sitara

Ordering Number :

TMDXEV3358  
TMDXICE3359  
TMDXIDK3359  
TMDXWL1271COM6M
